Volume 51 (1989)

No. 1

S.-J. Bae, S. Kitamura, L.G. Herbette and J.M. Sturtevant (New Haven and Farmington, CT), <i>The effects of calcium channel blocking drugs on the thermotropic behavior of dimyristoylphosphatidylcholine</i>	1
A. Liav and M.B. Goren (Denver, CO), <i>Synthesis of 6,6'-di-O-mycoloyl- and corynomycoloyl-(α-D-galactopyranosyl α-D-galactopyranoside) via triflates</i>	9
P. Fahlstadius and M. Hamberg (Stockholm, Sweden), <i>A gas-liquid chromatographic method for steric analysis of epoxy acids</i>	15
A. Mellier (Poitiers, France), <i>Infrared study of phospholipid hydration. New thermodynamic data about the main phase transition of saturated phosphatidylcholine water multidispersions</i>	23
A. Savagnac, H. Aurelle, C. Casas, F. Couderc, P. Gavard, D. Promé and J.-C. Promé (Toulouse, France), <i>Structure determination of mycolic acids by using charge remote fragmentation</i>	31
M.R. Roth, F.L. Smardo Jr. and R. Welti (Manhattan and Kansas City, KS), <i>Analysis of dimeric species derived from the reaction of phosphatidylethanolamine with dimethylsuberimide</i>	39
N. Hiramatsu, T. Inoue, M. Suzuki and K. Sato (Fukuoka, Amagasaki and Higashi-Hiroshima, Japan), <i>Pressure study on thermal transitions of oleic acid polymorphs by high-pressure differential thermal analysis</i>	47
G.R.A. Hunt and M. Kaszuba (Pontypridd, U.K.), <i>The effect of n-alcohols on vesicular permeability induced at the lipid phase transition temperature: a ^1H-NMR study</i>	55
Short Communication	
I. Voszka, S. Györgyi and M. Bihari-Varga (Budapest, Hungary), <i>Effect of glycosaminoglycans and divalent cations on the thermal properties of dipalmitoylphosphatidylcholine</i>	67
Book Review	73

No. 2.

E. Hantz, A. Cao, R.S. Phadke and E. Taillandier (Bobigny, France and Bombay, India), <i>The effect of loperamide on the thermal behavior of dimyristoylphosphatidylcholine large unilamellar vesicles</i>	75
T. Nishiya and T.M.S. Chang (Montreal, Canada), <i>The use of circular dichroism active phospholipid to study lipid transfer between liposomes: effects of cholesterol and melittin on spontaneous lipid transfer</i>	83
R. Tampé, A. Winter, P. Wohlfart, J. Becker and H.J. Galla (Darmstadt, F.R.G.), <i>Reconstitution and electron paramagnetic resonance-spectroscopic characterization of glycophorin containing phospholipid vesicles</i>	91
P.P. Constantinides, L.Ghosaini, N. Inouchi, S. Kitamura, R. Seshadri, M. Israel, A.C. Sartorelli and J.M. Sturtevant (New Haven, CT and Memphis, TN), <i>Interaction of N-alkylanthracyclines with lipid bilayers: correlations between partition coefficients, lipid phase distributions and thermotropic behavior</i> ...	105
M. Crestani, E. De Fabiani, B. Malavasi, M. Cancellieri, G. Galli and E. Bosio (Milan, Italy), <i>Effect of natural and structurally modified bile acids on cholesterol metabolizing enzymes in rat liver microsomes</i> ...	119
B. Maggio and R.K. Yu (New Haven, CT), <i>Interaction and fusion of unilamellar vesicles containing cerebroside and sulfatides induced by myelin basic protein</i>	127
K.H. Cheng (Lubbock, TX), <i>Fluorescence depolarization study on non-bilayer phases of phosphatidylethanolamine and phosphatidylcholine lipid mixtures</i>	137

No. 3,4 Special Issue : Polyprenols and Dolichols

Foreword.....	v
V.V. Veselovsky, N.Ya. Grigorieva and A.M. Moiseenkov (Moscow, USSR), <i>Synthesis of compounds relating to polyprenols</i>	147
L. Jaenicke and H.-U. Siegmund (Köln, F.R.G.), <i>Synthesis and characterization of dolichols and polyprenols of designed geometry and chain length</i>	159
T. Takigawa, K. Ibata and M. Mizuno (Okayama, Japan), <i>Synthesis of mammalian dolichols from plant polyprenols</i>	171
Y. Tanaka and H. Hirasawa (Tokyo, Japan), <i>Sequence analysis of polyprenols by 500 MHz ¹H-NMR spectroscopy</i>	183
L.L. Danilov, T.N. Druzhinina, N.A. Kalinchuk, S.D. Maltsev and V.N. Shibaev (Moscow, USSR), <i>Polyprenol phosphates: synthesis and structure-activity relationship for a biosynthetic system of Salmonella anatum O-specific polysaccharide</i>	191
M.J. Knudsen and F.A. Troy (Davis, CA), <i>Nuclear magnetic resonance studies of polyisoprenols in model membranes</i>	205
J.S. Schutzbach and J.W. Jensen (Birmingham, AL), <i>Bilayer membrane destabilization induced by dolichylphosphate</i>	213
W. Gibson Wood, G.Y. Sun and F. Schroeder (St. Louis and Columbia, MO and Cincinnati, OH), <i>Membrane properties of dolichol in different age groups of mice</i>	219
T. Janas, J. Kuczera and T. Chojnacki (Podgórna, Wrocław and Warsaw, Poland), <i>Voltammetric analysis of polyisoprenoid-containing bilayer lipid membranes</i>	227
B.L. Clarke, C. Naylor and W.J. Lennarz (Birmingham, AL and Houston, TX), <i>Comparative studies on mannosylphosphoryl dolichol and glucosylphosphoryl dolichol synthases</i>	239
W.J. Jankowski, G. Palamarczyk, I. Krajewska and T. Vogtman (Warsaw, Poland), <i>Specificity of cellular processes and enzymes towards polyisoprenoids of different structure</i>	249
R.K. Keller, S.W. Nellis and L. Cuadrado-Simonet (Tampa, FL), <i>A rapid procedure for the separation and analysis of metabolites of the sterol and dolichol pathways</i>	261
D.C. Crick, R.T. Rymerson, K.K. Carroll and J.W. Rip (London, Canada), <i>Metabolic labelling of polyisoprenoids using tritiated water</i>	269
W.L. Adair, Jr. and N. Cafmeyer (Tampa, FL), <i>Characterization of dolichyl diphosphate phosphatase from rat liver</i>	279
